### PROFILE

Motivated and detail-oriented IT Software Developer with a strong foundation in software testing, web development, and programming. Committed to continuous learning and professional growth, with a passion for building reliable, user-focused applications. Proficient in identifying and resolving technical issues, improving code quality, and contributing to collaborative development projects. Eager to join a dynamic team where I can expand my skills, take on new challenges, and contribute to meaningful software solutions.

### PROJECTS

#### Personal Portfolio Website(Group)

ONGOING

My responsive personal portfolio website showcasing my projects, skills, and experience, designed to highlight professional achievements and attract potential opportunities.

#### Web Application - Employee Login and Registration System(Group)

A secure web application that allows employees to register, log in, and manage their profiles, ensuring efficient user authentication and data access control.

#### Desktop Application - Employee Management System(Group)

A desktop Employee Management System designed to streamline employee data handling, including records management, attendance tracking, and payroll processing.

#### To Do list Website

A simple and user-friendly To-Do List web application that helps users organize tasks, set priorities, and manage their daily activities efficiently.
